

BRIDGETEX PIPELINE COMPANY, LLC

Local Tariff

APPLYING ON THE TRANSPORTATION OF

CRUDE PETROLEUM

TO AND FROM POINTS NAMED HEREIN

Governed, except as otherwise provided herein, by rules and regulations published in BridgeTex Pipeline Company, LLC's F.E.R.C. No. 1.3.0 and supplements thereto and reissues thereof.

[W] Issued under authority of 18 CFR 341.3(b). ~~342.3.~~

[C] ~~Certain rates in this tariff have been adjusted to comply with Commission's January 20, 2022 order in Docket No. RM20-14-001 (the "Order on Rehearing"), which reduced the oil pipeline index for the five-year period beginning on July 1, 2021 (the "Revised Index"). If all or any portion of the Order on Rehearing is reversed and the oil pipeline index for the five-year period beginning on July 1, 2021, is increased from the Revised Index, Bridgetex reserves the right to collect from shippers the positive difference between the rates for all barrels shipped from March 1, 2022 forward.~~

[N] Issued on eighteen (18) days' notice under authority of 18 CFR 341.14. This tariff publication is subject to refund pending a 30-day review period.

The provisions published herein will, if effective, not result in an adverse effect on the quality of the human environment.

Issue Date: March 11, 2022

Effective Date: March 30, 2022

TABLE OF RATES

All Rates are for pipeline transportation only.
[U] Unchanged. All rates are unchanged.

FROM (Origin) (Note 1)	TO (Destination) (Note 2)	Local / Uncommitted Shipper Rate	Committed Shipper Rates (Notes 4 and 7)		
		Rate in Cents per barrel of 42 U.S. Gallons	Tier Level	Range of Daily Contract Volume Commitment (bpd)	Rates in Cents per barrel of 42 U.S. Gallons
Colorado City, TX	<u>Houston Gulf Coast area:</u> <ul style="list-style-type: none"> • East Houston • Speed Junction • Genoa Junction • Texas City 	414.34 (Note 3)	1 (Note 5)	10,000 – 30,000	438.44
			2 (Note 6)	100,000 – 200,000	271.74

NOTES APPLICABLE TO TABLE OF RATES

Note 1: The Origin (“Origin”) for this Tariff is the inlet flange to the Carrier Facilities located in Colorado City, Texas.

Note 2: The Destination (“Destination”) for this Tariff is the Houston Gulf Coast area, which includes any of the following delivery points that are connected to and capable of receiving Crude Petroleum from Carrier’s pipeline facilities:

- (a) **East Houston:** That certain delivery location into Carrier’s tankage at Magellan’s East Houston Terminal located at 7901 Wallisville Road, Houston, Texas.
- (b) **Speed Junction:** That certain delivery station located at 1313 W. Pasadena Freeway, Pasadena, Texas 77506.
- (c) **Genoa Junction:** That certain delivery station located at the connection point with third party facilities, approximately 5.6 miles due south of Speed Junction.
- (d) **Texas City:** Those certain delivery stations in the Texas City, Texas area, which provide direct access to Valero’s Texas City Refinery and Marathon’s Texas City refineries.

Note 3: The “Local/Uncommitted Shipper Rate” set forth in the Table of Rates applies to those shippers that have not entered into a Transportation Services Agreement (“TSA”) with

Carrier during the open season held by Carrier beginning in June, 2012 or the supplemental open season held by Carrier beginning in July, 2014 and to Committed Shippers, as described in Notes 5 and 6 below.

Note 4: The “Committed Shipper Rates” set forth in the Table of Rates are available to those shippers that entered into a TSA with Carrier during the open season held by Carrier beginning in June, 2012 or the supplemental open season held by Carrier beginning in July, 2014 and committed therein to ship the specified amount of Crude Petroleum per day (“Daily Volume Commitment”) from the Origin to the Destination specified above for a specified term (“Committed Shipper”).

Note 5: The Tier 1 Firm Committed Shipper Rate is available to Committed Shippers who committed in a TSA to ship, for a term of at least seven (7) years, a volume of Crude Petroleum in the indicated volume range at a rate that is higher than the rate available to Uncommitted Shippers, as well as higher than the rate available to Tier 2 Committed Shippers. The volumes of Crude Petroleum shipped by Tier 1 Committed Shippers are not subject to prorationing under Item 150 of Carrier’s Rules and Regulations tariff under normal operating conditions. The Local/Uncommitted Shipper Rate shall apply to volumes shipped by Tier 1 Committed Shippers, on a monthly basis, in excess of such shipper’s Daily Volume Commitment.

Note 6: The Tier 2 Committed Shipper Rate is available to Committed Shippers who committed in a TSA to ship a volume of Crude Petroleum in the indicated volume range for a term of at least ten (10) years. The Tier 2 Committed Shipper Rate is also available to such Committed Shippers shipping volumes, on a monthly basis, of up to 10% in excess of the Shipper’s Daily Volume Commitment on a space-available basis. The Local/Uncommitted Shipper Rate shall apply to volumes shipped by Tier 2 Committed Shippers, on a monthly basis, in excess of 110% of the shipper’s Daily Volume Commitment.

Note 7: All volumes of Crude Petroleum shipped by Carrier on behalf of a Committed Shipper during a Contract Quarter (defined below) from the Origin to the Destination under this Tariff will apply towards the Committed Shipper’s “Minimum Contract Quarterly Volume Commitment,” which is equal to the Committed Shipper’s Daily Contract Volume Commitment multiplied by the number of days in the applicable Contract Quarter. A “Contract Quarter” is defined for purpose of a TSA to be a three-month period beginning on January 1, April 1, July 1, or October 1 of a calendar year (with a potential “stub quarter” during the first quarter following the Service Commencement Date.)

PAYMENTS AND DEFICIENCY PAYMENTS UNDER TSA

1. For each Contract Quarter a Committed Shipper is responsible for making a Minimum Quarterly Payment (“MQP”) to Carrier, which equals the amount, in dollars, of the product of (a) the Committed Shipper’s “Daily Actual Volume Commitment,” which is (i) the Committed Shipper’s Minimum Contract Quarterly Volume Commitment, reduced to account for any Barrels of Crude Petroleum that the Committed Shipper properly tendered to Carrier during the Contract Quarter but that Carrier was unable to transport for any reason, including but not limited to force majeure and/or prorationing (the “Minimum Actual Quarterly Volume Commitment”), divided by (ii) the number of days in the Contract Quarter; multiplied by (b) the number of days in such Contract Quarter; multiplied by (c) the Committed Shipper Rate applicable to such Daily Actual Volume Commitment, in effect for each such calendar day during such Contract Quarter.

2. If a Committed Shipper fails to ship its Minimum Actual Quarterly Volume Commitment (as such Minimum Actual Quarterly Volume Commitment may be reduced as stated above) in a Contract Quarter, then such Committed Shipper shall make a payment (“Deficiency Payment”) to Carrier at the end of the Contract Quarter equal to the MQP less (a) any payment reductions resulting from force majeure situations, proration, or any other failure of Carrier to accept Crude Petroleum for transportation under the TSA for any reason other than the Committed Shipper’s default or failure to perform, excluding however any payment reductions that have already been accounted for in the calculation of the Committed Shipper’s Daily Actual Volume Commitment; (b) the aggregate payments received by Carrier from Committed Shipper with respect to shipments made during the Contract Quarter for transportation charges; and (c) any Deficiency Payment Credit(s) available to the Committed Shipper, as such term is defined below.

3. Any payment received by Carrier from a Committed Shipper in a Contract Quarter for shipments of Crude Petroleum delivered into Carrier’s facilities at the Origin for shipment to the Destination in excess of the Committed Shipper’s MQP will serve as a credit, on a dollar-for-dollar basis, against any Deficiency Payments due from Committed Shipper with respect to the four (4) Contract Quarters immediately following the Contract Quarter with respect to which such excess payment was paid (“Deficiency Payment Credit”).

4. In the event that a Deficiency Payment is made, the Committed Shipper will be credited for prepaid transportation, on a dollar-for-dollar basis, toward the Committed Shipper’s payment obligations for its deliveries made during the twelve (12) Contract Quarters immediately following the Contract Quarter with respect to which the Deficiency Payment was paid. Such prepaid transportation credits will only apply to transportation fees in excess of the Committed Shipper’s MQP in the applicable Contract Quarter. Any remaining credit that is not applied within the allotted time period and prior to termination of the TSA will remain available for use by Committed Shipper for one year after termination of the TSA, but will expire and be of no further use or effect thereafter.
